

Data Leaks in the Government and Financial Sectors in the Middle East and Neighboring States

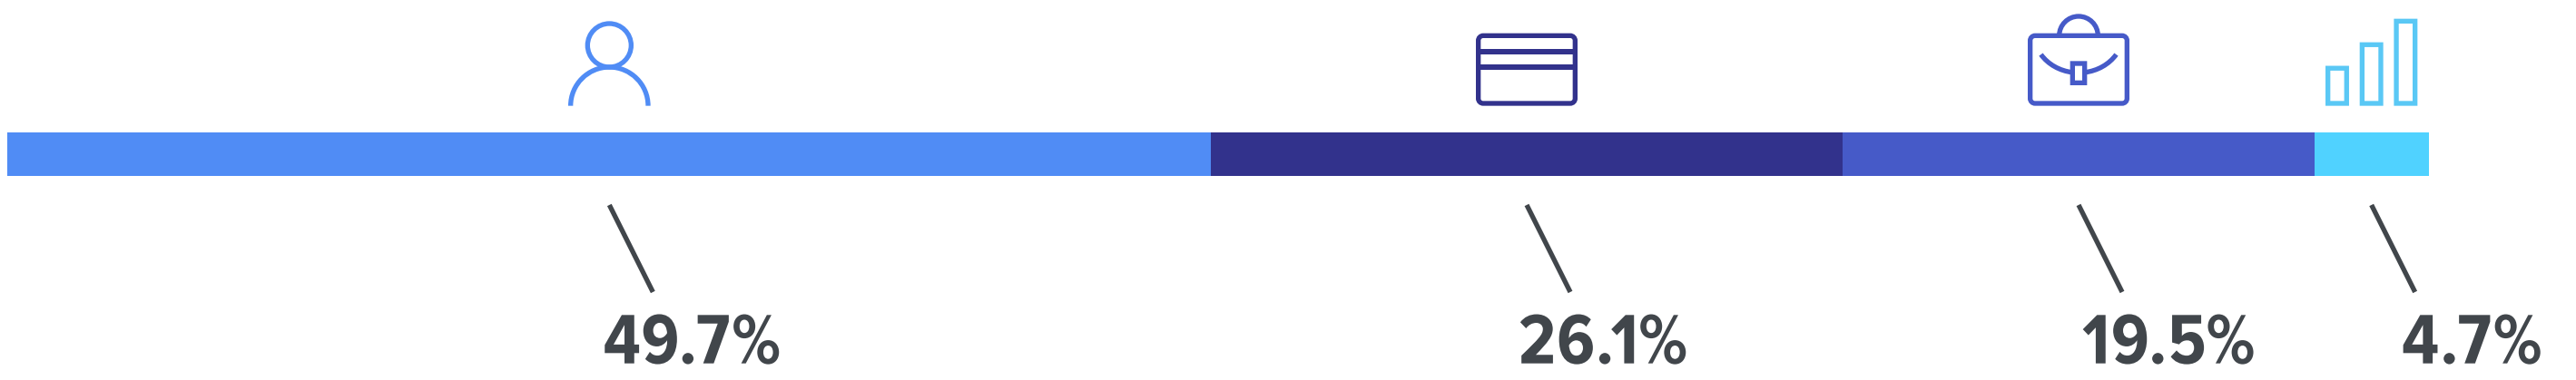

H2 2017 — H1 2018

Breakdown by Attack Vector

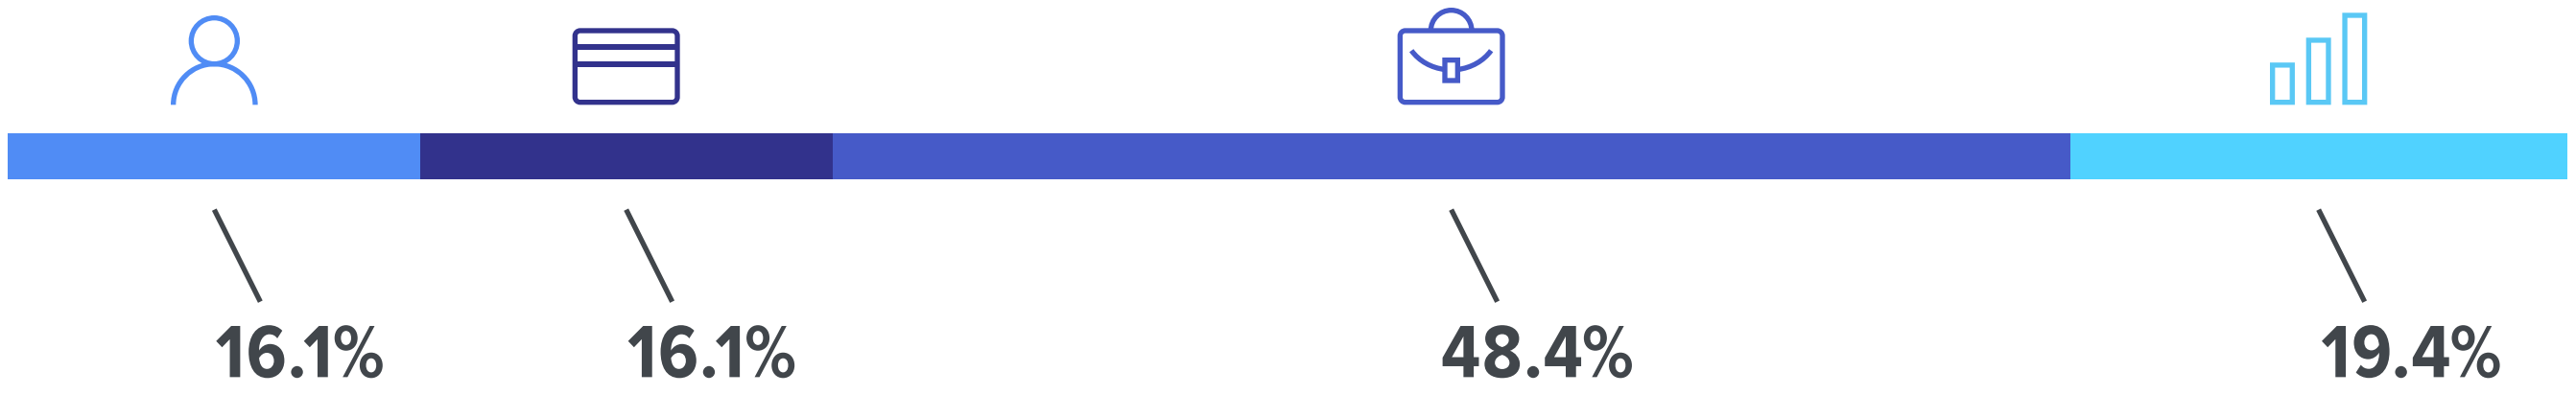

Breakdown by Data Type

Globally

Middle East

- Personal data
- Payment information
- State secret
- Trade secret, know-how

The comparative analysis of the global and regional breakdowns of leaks by data type yielded unexpected results. While personal and payment information makes 75% of the leaks from the government and financial sectors globally, its share is less than 33% in the Middle East.
